

About Us

We offer our services through three, distinct teams:

Treatment Team

Provides therapy and diagnostic services to children, adolescents, adults, couples and families.

Assessment Team

Provides psychological and psychoeducational assessment services to young people between 5 and 19 years of age and their families. This team also assesses adults who want to learn if they might have ADHD.

Assessment Follow-Up Team

Works with the families of clients who have had a psychological or psychoeducational assessment to help them implement specific recommendations offered in that assessment.
